Design Operations & Research at Jio

How I work, what I own, and the impact I drive

30+ products | 15 experience standards | 33+ research studies

UX Research Lead · Experience Strategy · Design Systems

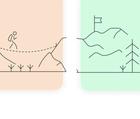
DesignOperations

Trainings & Communications | Design Audits | Research CoE

How I run DesignOps at Jio — three interconnected workflows that keep product quality consistent at scale.

Design Research

UX Research @ Jio - What I Do



My Role

Leading UX research across 30+ Jio products — defining standards, running studies at scale, and translating findings into frameworks that product and design teams actually use.

What I Solve

- Understand user needs, motivations & friction
- Align product teams with experience standards
- Improve adoption, usability & trust at scale

Research Methods

- Qualitative: Usability testing, interviews, field visits, contextual inquiry
- Quantitative: Surveys, funnel analytics, task success & behavior metrics
- Benchmarking: Competitive + Global standard studies
- Concept Evaluation: Rapid prototyping & iteration cycles

Where I Drive Impact

- Built the 15-standard One Jio Experience Framework adopted across 30+ products
- Conducted 33+ end-to-end UX studies with 350+ participants.
- Improved DS adoption by 35–50% through research-led documentation and onboarding.
- Built AI audit tools (Claude + Figma MCP) cutting review time from days to hours

Worked on Digital Platforms

Reliance NEW ENERGY | JioTV | My Jio | Jio FINANCIAL SERVICES | Jio.com | Jio Fit | JioHome | JioMessages | JioTranslate

Design Excellence and Cohesion at Jio

Current Phase Roadmap 2025-2026

Migrating to Jio Design System 3.0

Resolve inconsistent user experiences due to a lack of standardization.

- Implement the new Jio Design System (JDS).
- Conduct Product Alignment Assessments.

System Integration

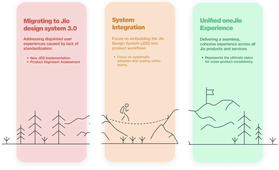
Embed the Jio Design System into daily product workflows.

- Ensure systematic adoption.
- Enable scalability across teams.

Unified OneJio Experience

Create a seamless and cohesive user experience across all Jio products and services.

- Achieve cross-product consistency as the final, unified design goal.



↑ SOI Alignment Status Report

Product Experience Enhance Framework

This framework is applied across 30+ Jio products as the standard for experience quality assessment from UI layer all the way to customer experience strategy.

↑ SOI Design Operations

Purpose

To ensure every Jio product meets a consistent, measurable bar of experience quality one that is repeatable across teams and tied directly to real user needs.

Measurable quality

Consistent experience

User-centred decisions

Methodology

Principles in action

Imbibing Jio's 10 experience design principles to all products within Jio

Evaluation parameters

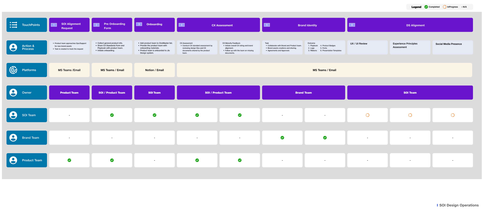
Evaluating the products based on objectified audit parameters on 10 experience principles

Quality scorecard

Rating Jio products against the quality parameters

SOI Adoption

SOI adoption tracked across 32+ product teams in 2024–25.



↑ SOI Design Operations

AI-Powered Automation

How I used Claude AI and Figma MCP to automate compliance reviews replacing a fully manual process.

What I built

Experience Principles Verification tool automatically evaluates any Jio product against 27 criteria across 10 experience principles using live Figma design data.

And also

CX Assessment tool covers 44 criteria across 15 CX standards. Generates an interactive HTML report with in-report approval workflows

The result

Audit turnaround cut from days to hours. Product teams can now run self-serve compliance checks without waiting on central DesignOps.

Built with: Claude AI · Figma MCP · Interactive HTML reporting · Figma Plugin API

↑ SOI Design Operations

Let's talk about how I can bring this to your team.
